Overview

Mogoboya Engineers and Consultants (Pty) Ltd is a multidisciplinary infrastructure company offering professional services in civil engineering, general building, electrical works, mechanical engineering, plumbing, project and construction management, OHS consulting, and CETA-accredited training. Rooted in public-sector delivery, we execute compliant, quality projects from feasibility and design through construction, commissioning, and close-out.

Vision

To become Limpopo's leading provider of OHS and infrastructure compliance solutions through strategic partnerships, technical excellence, and local empowerment.

Mission

To deliver consistent, audit-ready, and stakeholder-aligned OHS support services that exceed regulatory standards and reduce risk across construction and industrial environments.

Core Services

- **Civil Engineering:** Roads, stormwater, bulk services, municipal infrastructure; lifecycle: concept → design → construction → close-out.
- **General Building (GB):** Turnkey building works, renovations, and facilities maintenance with strict quality and cost control.
- **Electrical (EP):** LV/MV reticulation, public/street lighting, compliance documentation, and commissioning.
- **Mechanical Engineering (ME):** Mechanical installations and maintenance for water & public works infrastructure.
- **Plumbing (SO):** Water reticulation, sewer systems, sanitation facilities compliant with SANS standards.
- **Project & Construction Management:** Planning & scheduling, BOQs, procurement support, contractor management, and site supervision.
- **OHS Consulting & Agent Services:** Baseline & task risk assessments, OHS files, site audits, toolbox talks; Construction Regulations compliance.
- **CETA-Accredited Training:** Accredited skills development programmes in construction, OHS, and site supervision; focused on upskilling emerging contractors and enhancing compliance with national training standards.
- **Plant & Equipment Importation:** Importation of TLBs, Excavators, Rollers, and Graders directly from China to South Africa; permits and export licences in place.

The team is supported by:

- External auditors (on-call basis)
- Local safety file technicians
- Rotational site officers (during construction peak months)

All team members have relevant certifications, are available full-time on-site as needed, and have a demonstrated history of project delivery and compliance alignment.

Company Experience

Mogoboya Engineers and Consultants (Pty) LTD has a proven track record in delivering occupational health and safety (OHS) management and compliance solutions across civil infrastructure and construction projects. Our team has successfully supported public and private sector clients in the implementation of site-specific OHS plans, legal compliance audits, safety file development, and risk mitigation strategies.

With experience spanning bulk infrastructure, municipal services, and mixed-use developments, we are well-versed in the Construction Regulations (2014), OHS Act, and industry-specific safety standards. Our staff have managed safety compliance on multi-million Rand projects, including roads, sewer networks, water infrastructure, and facility upgrades. Our project history reflects our commitment to professional integrity, proactive safety culture, and consistent client satisfaction.
